### About This Game

Lone Wolf is a game to become a captain of the space warship "Lone Wolf", like Captain Harlock of Arcadia or Yamato of Space Battleship to experience of a space battle opera.

#### **Point 1 : Strategic turret installation according to the characteristics of the enemy gas**

You will fall into the charm of a gun that emits a powerful firepower toward the enemies, and you will be attracted by the various charms of the space warship "Lone Wolf".

Various turrets installed on space battleships

Turrets (turrets) that are installed in a battleship are divided into a physical system and an optical system. You can operate a tactical battle by installing turrets (turrets) that match the type and nature of the enemies the appearance.

#### **Point 2 : Strengthening and Growing the Skills**

Space Battleship Yamato's Skill Wave with the space battleship Lone Wolf's skill to show off the enough power to change the battle board

Plasma flare / Energy shield / Hyper booster

It has a plasma flare skill that generates powerful energy waves within a certain range around a space warship of Lone Wolf, and

---

an energy shield that reduces damage by creating a shield on a warship, and a hyper booster skill that increases the movement speed of a certain time of period.

### **Contents**

#### **Mission**

3 chapter & Extra mission total 40 mission

#### **Survival**

Survival is Infinite play content. Staying for a long time from the enemies.

#### **Play Tip!!**

Users should attack enemies, keeping proper distance from them!!

Enemies that are appeared would approach toward the battleship to damage it.

Radar plays the role as a device to show from which direction enemies are approaching to the battleship. With Radar's help, users get to notice a route from which enemies are closing in on the battleship and then move against from a route that enemies approach.

While enemies are coming near to attack the battleship, users could gain time as well as secure the time to subdue enemies.

Hey guys who bought this. Do you guys know how to get the bus in game? I have the decals and everything but I can't seem to find out how to get the bus.

Thanks

. Ah, the nostalgia. Traveling the world as a spy for SpyCorps, Spy Fox must stop a plot so evil, that I cannot repeat it. Dr. No would be proud of it. Spy Fox is the world's only hope.. I love this game. Everytime I die I want to give it one more shot.. ITS JUST SHEIT BUT I GOT IT DONATED SO <3. This "game" feels more like a test of software and an engine. Unique, stylish, but extremely short-lived.. The game is great! I had fun playing it. Can't wait for Year 2! :D. If you are going to get Cossacks 3, go big and get all the content with ALL the nations and missions. You won't regret it if you like the base game. If you are a fan of SLRR, then this is for you. I hope im not offending the dev of this game by saying that, but this game made me think of SLRR.

I know it is still early days, but this is all ready solid and imo it will only get better from here.

Keep up the good work.!!!!

. This game is some hot garbage lmao

Pillaging and looting in style!. dis is an awesome idle game

10V10. This is terrible wasted 10 bucks to wait a hour for a simple picture to be fubar dont waste your money or storage . It's basic, but GREAT! Full price is reasonable, but sale is always a plus. It's a bit of a hand full on take off. 3/4 power until the tail lifts, then pour the coal to it. She flies awesome, but there is NO TRIM. I've found she'll climb very well at full power, and will cruise level at 1,050-1,100 RPM. Don't forget to adjust your mixture at altitude.

Easy to learn, just follow the check lists.

. The game looks better than motogp 17 but works worse then that game. I loved motogp 17 but i couldn't even play this one since it does not recognize my controller (Logitech F310). My controller works fine with all other games so its is a bug of this game. Until they fix this bug and make the game playable for me, i cannot recommend this. Go for motogp 17. If i can play this game, i would edit my review.. The core fighting game is actually decent for an indie title, and the characters look like their real life counter-parts. If you want to see politicians beat each other up while yelling memey catch-phrases that are associated with them, you might enjoy this game. Otherwise, there are better, more polished fighting games on steam, several of which are free to play.

There are several issues that make this game a one-and-done deal rather than a game you can expect to play regularly.

- There is no online multiplayer.
- There is little variation between the characters move sets.
- Controls are a bit weird and the move-list published in the game isn't complete or accurate.
- The AI is a bit stupid and likes to jump around a lot without throwing moves.
- The options menu is really limited, you are unable to adjust things like rounds to win, round timer, etc.
- "Story mode" is the only single player mode, and it doesn't have much of a story, it's basically arcade mode.
- There are no character specific story lines or endings, you get the same two lines of text at the end of the game.
- Characters are not balanced. Putin is extremely strong. Lincoln is kinda weak.
- Menus are difficult to use because the highlighted option is so faint it's hard to tell what selection you are on.
- Music and dialogue is not volume adjusted so sometimes the game will get really loud (Donald Trump's outro for example.).

Enjoyed this Game. Like the first Isoland game it is visually appealing and has a surreal charm all of it's own. I found the first Isoland a bit too demanding (eg randomly having to click an object more than once to make something happen) and resorted to a walkthrough a few times. However Isoland 2 got the difficulty level about right for me - so pretty well ticks all the boxes.

PS The second time you play through you get altered puzzles and an extra challenge/mission - what's not to like. This game was surprisingly fun and I really enjoyed the absurd yet realistic story of it.. I really wanted to like this game. I am a massive fan of boss rush games and this one had an interesting mechanic and great art design. However, there is one major flaw in its design that makes it unbearable to play. There is no retry button on bosses. This means that you have to spend at least ten seconds to walk all the way back to the boss, most of the time longer than that. For a game with bosses that kill you in one hit and are not always clear on how to beat, this means about 80% of the game is wasted going back to fight the same boss. I am disappointed in this because what is played in the two seconds of actual fighting is fun. The controls aren't bad and the bosses are unique, but this is weighed down by the fact that you spent an hour playing this game with maybe five minutes of actual gameplay. If they fix this, buy this game. It really seems like something special, but without this one feature, it is unplayable.
